Cliffs Asia Pacific Iron Ore's Koolyanobbing operations serve the Asian iron ore markets with direct-shipped fines and lump ore. Ore is crushed and blended at a plant located at Koolyanobbing and then transported by rail for shipment from the port of Esperance.

Utilisation of Esperance Ports Sea and Land brings substantial economic benefits to the Esperance community. Additionally the company strives hard to establish strong and respectful relationships with the local community and often supports community initiatives, community facilities and community organisations.
