

MEDIUM BUSINESS OF THE YEAR

WA COUNTRY BUILDERS

WA Country Builders aim to provide a 'Better Building Experience'. This fundamental ethos has formed the cornerstone of over 6,000 homes that WA Country Builders have designed and built since 1991.

WA Country Builders are a family owned business with more than 20 years of experience in building across regional WA and they know that you deserve the best local advice, the widest choice of home designs and materials, great value and award-winning service from a builder you can rely on.

WA Country Builders are a true country builder born in the country and are committed to providing local staff and local tradespeople to look after you throughout the building process. Their experienced building supervisors ensure the construction of your home goes to plan and their Sales Consultants are HIA Accredited and HIA GreenSmart Accredited.

WA Country Builders experienced team of staff not only specialise in building in suburban areas but also in rural areas. From earthworks to orientation and bushfire attack levels (BAL), their team can address multiple factors associated with building in rural areas to provide you with peace of mind when you move into your new home.

WA Country Builders believe that just because you live in regional WA – you shouldn't have to accept limited choice. They can offer you more than 100 home designs and give you the biggest choice of new home designs by a country mile. They offer a range of homes tailored to fit your stage of life, from helping you into your first home, moving up to an affordable second home, perhaps your first investment home or even a rustic farmhouse nestled in the hills.

WA Country Builders understands the importance of creating a home that is comfortable all year round and minimises energy consumption. The principles of passive solar design are followed with all of their new homes and the correct orientation of your home ensures that it maximises the full solar aspect of your site. They respect the need to develop environmentally responsible construction technology through utilising the most sustainable building practices available. As a HIA Greensmart partner, they are constantly looking at ways to develop even more efficient construction methods and minimise construction wastage.

New homes aren't all that they build at WA Country Builders. They are equally at home designing and building wineries, residential developments, commercial developments, chalets, offices and retirement villages. Their team have been responsible for some exciting projects around the state including the Fox River Winery complex in Mt Barker, Kalbarri Golf Club, Albany Lifestyle Village and the Geraldton Mariners Commercial Complex to name a few.

WA Country Builders are a member of the [JWH Group](#), one of WA's largest building companies and as well as building a huge range of homes under the WA Country Builders banner, they also build homes for many of Perth's leading brands. Another reason why more people in regional WA trust building their new home with them.
